Gene Delivery Systems A Stateofheart Review:

Gene Delivery Systems, 1996 *Micro- and Nanotechnologies-Based Product Development* Neelesh Kumar Mehra, Arvind Gulbake, 2021-09-06

This book provides comprehensive information of the nanotechnology based pharmaceutical product development including a diverse range of arenas such as liposomes nanoparticles fullerenes hydrogels thermally responsive externally activated theranostics TREAT hydrogels microspheres micro and nanoemulsions and carbon nanomaterials It covers the micro and nanotechnological aspects for pharmaceutical product development with the product development point of view and also covers the industrial aspects novel technologies stability studies validation safety and toxicity profiles regulatory perspectives scale up technologies and fundamental concept in the development of products Salient Features Covers micro and nanotechnology approaches with current trends with safety and efficacy in product development Presents an overview of the recent progress of stability testing reverse engineering validation and regulatory perspectives as per regulatory requirements Provides a comprehensive overview of the latest research related to micro and nanotechnologies including designing optimisation validation and scale up of micro and nanotechnologies Is edited by two well known researchers by contribution of vivid chapters from renowned scientists across the globe in the field of pharmaceutical sciences Dr Neelesh Kumar Mehra is working as an Assistant Professor of Pharmaceutics Biopharmaceutics at the Department of Pharmaceutics National Institute of Pharmaceutical Education Research NIPER Hyderabad India He received TEAM AWARD for successful commercialisation of an ophthalmic suspension product He has authored more than 60 peer reviewed publications in highly reputed international journals and more than 10 book chapter contributions He has filed patents on manufacturing process and composition to improved therapeutic efficacy for topical delivery He guided PhD and MS students for their dissertations research projects He has received numerous outstanding awards including Young Scientist Award and Team Award for his research output He recently published one edited book Dendrimers in Nanomedicine Concept Theory and Regulatory Perspectives in CRC Press Currently he is editing books on nano drug delivery based products with Elsevier Pvt Ltd He has rich research and teaching experience in the formulation and development of complex innovative ophthalmic and injectable biopharmaceutical products including micro and nanotechnologies for regulated market Dr Arvind Gulbake is working as an Assistant Professor at the Faculty of Pharmacy School of Pharmaceutical Population Health Informatics at DIT University Dehradun India He has authored more than 40 peer reviewed publications in highly reputed international journals four book chapters and a patent contribution He has received outstanding awards including Young Scientist Award and BRG Travel Award for his research He is an assistant editor for IJAP He guided PhD and MS students for their dissertations research projects He has successfully completed extramural project funded by SERB New Delhi Government of India He has more than 12 years of research and teaching experience in the formulation and development of nanopharmaceuticals

Emerging Nanotechnologies for Diagnostics, Drug

Delivery and Medical Devices Ashim K Mitra, Kishore Cholkar, Abhirup Mandal, 2017-02-13 Emerging Nanotechnologies for Diagnostics Drug Delivery and Medical Devices covers the modern micro and nanotechnologies used for diagnosis drug delivery and theranostics using micro nano and implantable systems In depth coverage of all aspects of disease treatment is included In addition the book covers cutting edge research and technology that will help readers gain knowledge of novel approaches and their applications to improve drug agent specificity for diagnosis and efficient disease treatment It is a comprehensive guide for medical specialists the pharmaceutical industry and academic researchers discussing the impact of nanotechnology on diagnosis drug delivery and theranostics Gives readers working in immunology drug delivery and medicine a greater awareness on how novel nanotechnology orientated methods can help improve treatment Provides readers with backgrounds in nanotechnology chemistry and materials science an understanding on how nanotechnology is used in immunology and drug delivery Includes focused coverage of the use of nanodevices in diagnostics therapeutics and theranostics not offered by other books

The Nanotechnology Revolution Dale A. Stirling, 2018-01-17 Nanotechnology is changing the world in a very big way but at the atomic and sub atomic level Although the roots of nanotechnology can be traced back to more than a century ago the last three decades have witnessed an explosion of nano based technologies and products This reference work examines the history current status and future directions of nanotechnology through an exhaustive search of the technical and scientific literature The more than 4000 bibliographic citations it includes are carefully organized into core subject areas and a geographic and subject index allows readers to quickly locate documents of interest Although a sense of the global reach and interest in nanotechnology can be gleaned from the reference sections of countless journal articles conference papers and books this is the only reference work providing an in depth global perspective that is ready made for nanotechnology professionals and those interested in learning more about all things nanotechnology Despite the abundance of online resources there is still an urgent need for well researched well presented concise and thematically organized reference works Instead of relying on wiki pages citation aggregators and related websites the author searched the databases and databanks of scholarly literature search providers such as EBSCO ProQuest PUBMED STN International and Thomson Reuters In addition he used select serials related databases to account for pertinent documents from countries in which English is not the primary national language i e China Online Journals e periodica J STAGE and SciELO Brazil among others

State of the Art in Nano-bioimaging Morteza Sasani Ghamsari, 2018-06-20 Nano bioimaging is a real time observation method for the study of biological processes in subcellular structures and entire cells This technique aims to interfere as little as possible with life processes using nanoscale materials and probes In this method nanoscale photon source is often used for imaging and 3D structure of the observed specimen is studied in detail without physical interference Over the last decade further boost in bioimaging has led to increase the nano bioimaging impact that includes many improvements in the data analysis method image processing and molecular imaging

technology However to increase the usage of nano bioimaging several developments in the field of diagnosis accuracy photobleaching prevention and controlling of the fluorescence resonance energy transfer FRET must be achieved The purpose of this book is to provide a perspective on the current status of nano bioimaging technologies Current Literature on Science of Science ,1996 Catalóg Bhliantúil Ireland.
