Interface Between Chemistry And Biochemistry:

Interface Between Chemistry and Biochemistry Pierre Jollès, Hans Jörnvall, 1995-01-01 The increasing importance of the interface between chemistry and biology is probably the largest change in chemistry in the past 15 years More and more organic chemists are working on problems dealing with biology Once considered to be at the very outside edge of either field interfacial research is poised to move into the mainstream of both disciplines This merging of two types of approach has resulted in a vigorous research discipline with unprecedented potential to address important biological and chemical problems A series of examples are developed in this book Some analytical aspects are discussed first as the fundamental concepts are not only chemical but chemistry has provided biochemistry with powerful tools of analysis Physico chemical aspects are devoted to spectrometric studies of nucleic acids as well as lipids lipases and membrane proteins receptors Three chapters are included in the section dealing with enzymes The part devoted to metalloproteins is mainly directed toward zinc metallochemistry and NMR structural work on zinc proteins Chemists have been able to bring to biology their characteristic approach of synthesizing new molecules three chapters are devoted to peptides sugar compounds and biocatalysts Two chapters discuss new active compounds antibacterial peptides catalytic antibodies which are the result of collaboration between chemists and biochemists Contents Foreword P Jolles and H Jörnvall Chemistry at interfaces and in transport Lipase structures at the interface between chemistry and biochemistry F Carriere R Verger A Lookene and G Olivercoma Structure and orientation of hydrophobic surfactant associated proteins in a lipid environment G Vandebussche J Johansson A Clercx T Curstedt and J M Ruyschaert Enzyme function in organic solvents M N Gupta Protein sorting signals Simple peptides with complex functions G von Heijne Chemistry and biochemistry Enzymes Chemistry and biochemistry J Jeffery Analysis of the structure of naturally processed peptides bound by class I and class II major histocompatibility complex molecules E Appella E A Padlan and D F Hunt Catalytic antibodies Evolution of protein function in real time R A Lerner and K D Janda Analysis of proteins and nucleic acids Chemical techniques employed for the primary structural analysis of proteins and peptides A S Inglis G E Reid and R J Simpson UV and nucleic acids T Douki and J Cadet Synthesis of active compounds Chemical and enzymatic synthesis of glycopeptides M Schultz and H Kunz Peptides as active probes A Unden and T Bartfai Metalloproteins Zinc metallochemistry in biochemistry B L Vallee and D S Auld NMR Structural studies on the zinc finger domains of nuclear hormone receptors R M A Knegt M A A van Tilborg R Boelens and R Kaptein Subject index Series Experientia Supplementum Volume 73 The Journal of Biological Chemistry ,1930 Vols 3 include the society s Proceedings 1907

The Interaction of Sciences in the Study of the Earth D. I. Sheherbakov, V. V. Belousov, 2002 This book is a collection of articles on a variety of logically interlinked problems relating to the study of the earth and the evolution of the different sciences that engage in this study the geosciences as they are sometimes called the nature and place of modern geology among other sciences the tendencies in its development the specific features of the so called geological form of motion of

matter and its connection with other forms of motion the place of geophysics and geochemistry in the study of the planet and in the system of sciences investigating the earth some philosophical aspects of the transformation of nature On a number of questions the authors express different points of view and the reader is able to judge for himself of the merits and demerits of their theories The volume will no doubt be of interest to geologists geophysicists geochemists geographers and philosophers to say nothing of the ever growing circle of inquisitive readers who take an interest in the exploration of our native planet and the philosophical and methodological questions deriving therefrom The papers were originally presented at joint the theoretical conferences of philosophical methodological seminars scientific establishments of the U S S R Academy of Sciences The papers prepared for this collection were revised and supplemented by their authors
