Abstract

We present an outline of a checklist, the TUP-model, that covers the technological, usability, and pedagogical aspects of the educational environment so that more complete evaluations may be created. We base our model on our experience in usability evaluations and work with teachers in evaluating educational environments.

1. Introduction

Teachers selecting software environments for use in their own educational settings face a daunting task with the ever increasing number of educational environments available. By educational (software) environments we mean any software system or other electronic material that is used in an educational setting. Trying to find reviews of the plethora of environments available is even more challenging. Comparing the systems using the found reviews is currently even more difficult as there are no existing widely used evaluation methods.

2. Existing checklists

A number of generic checklists have been created for the evaluation of pedagogical and usability aspects or technical issues of software environments. In most cases generic checklists are adequate enough as creating domain specific checklists is a time-consuming and expensive task which is often left undone. Of the various checklists that have been created to help in the evaluation of educational environments we will take a brief look at the Delta checklist [7] and the constructivist checklist [2].

The constructivist checklist is directly tied to the underlying theory and focuses almost exclusively on the pedagogical aspects of the system being evaluated. The Delta checklist takes a slightly broader perspective with a strong emphasis on evaluating multimedia and visual appearance.

Ravden and Johnson [5] have created a method for evaluating the usability of a computer application. Our experiences with a slightly modified checklist [8] enable us to argue that the checklist is usable with end-users.

We have also used the Delta and modified Ravden and Johnson checklists with teachers creating the evaluations. The experiences obtained from these efforts have prompted us to begin the development of a new evaluation model.

3. The TUP-model

The experiences we have of using various checklists in the evaluation of educational environments has shown that they all concentrate mainly on one aspect, mainly the pedagogical aspect. Thus we propose to create a checklist that takes into consideration the instructional, technical, and usability aspect of educational environments. Some earlier work in this field exists (e.g. [6] and [3]). Of these the work done by Squires [6] is a step closer to our approach in which he extends heuristic checklists to include the evaluation of the environment's suitability to a given learning situation.

Our proposed checklist concentrates equally on the three aspects, thus the TUP-model. The three aspects are strongly interrelated, as shown in Fig. 1. As can be seen, both usability and pedagogy build upon the foundation of the technological aspects. Usability and pedagogy are interdependent and all three aspects have the functionality of the environment at their core.

It is important to note is that the whole evaluation is based on a single scenario of use. While use scenario's description belongs to the pedagogical aspect, we feel that it must be kept in mind during the whole evaluation. This means that undue generalizations must be avoided and the answers should relate to the use scenario.

For each of the three aspects we need to consider several different issues. In the technical aspects we must consider the availability, maintainability, and ease of initial setup and administration of the environment. In addition, the environments security and respect for the privacy of its users must

Evaluating Educational Environments Introduction

In today's digital age, the availability of Evaluating Educational Environments books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Evaluating Educational Environments books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Evaluating Educational Environments books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Evaluating Educational Environments versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Evaluating Educational Environments books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Evaluating Educational Environments books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent

resource for literature enthusiasts. Another popular platform for Evaluating Educational Environments books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Evaluating Educational Environments books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Evaluating Educational Environments books and manuals for download and embark on your journey of knowledge?
