### **Introduction**

#### **What Is Gender**

How can we define gender and sex?

What is meant by the term gender? How is gender defined in IR? Sometimes it is difficult to define 'gender' and how it differs from a closely related term 'sex'. Gender refers to the socially constructed roles, behaviour, activities and attributes that a given society considers appropriate for men and women (Tickner and Sjoberg 2007:196). It is culturally shaped and varies across time and place (Tickner; 1992). According to Gillian Youngs (2004; 77), "The concept of gender keeps to the fore the relational nature of categorizations of male and female and signals the importance of not taking either as given or necessarily natural. Oakley (1972) propagated the analytical distinction between biological sex and the socially constructed gender necessary to the study of gender.
