Financial Risks and Rewards in LNG Projects: Qatar, Oman and Yemen
by Ulrich Bartsch. Price: £90

Are LNG project really the 'cash cows' of the gas industry – and if so, for who – the governments or the foreign companies? This major report examines the latest four LNG projects designed to overcome the geographical limitations of the utilisation of Middle Eastern natural gas: QatarGas, RasGas, OmanLNG and YemenLNG. The study analyses in detail the sharing of risks and rewards between governments and foreign companies. It reveals how the four projects lead to quite different profit expectations for the partners involved. The analysis focuses on the following issues:

- The contributions of different elements – project finance, NGL sales, fiscal regimes and ownership structures – to the success or failure of the projects.
- The effects of project finance, fiscal regimes and ownership arrangements on the exposure of investors to risks.
- The development of unit costs and minimum supply prices for LNG based n actual project details.
