agencies and professional societies More than thirty new topics offer the latest clinical perspectives on primary care practice

Handbook of Bleeding and Coagulation for Neurosurgery Mark G. Hamilton, John G. Golfinos, Graham F. Pineo, 2014-12-15

This practical handbook presents the current options and best methods for bleeding prevention and management as well as treatment strategies for deep venous thrombosis DVT and pulmonary embolism PE all of which are important yet potentially intimidating issues frequently faced by neurosurgeons The chapters in the book are designed to help readers quickly and easily locate urgently needed information or go directly to a specific topic related to patient care Key Features Review of drugs and herbal products that affect coagulation with specific reversal strategies Preoperative and intraoperative methods to prevent and manage blood loss including strategies for blood replacement Recommendations for prophylaxis and treatment of DVT and PE Chapters dealing with the management of nine specific neurosurgical situations including brain tumor cerebrovascular trauma spinal and pediatric with patient examples Comprehensive and conveniently portable this handbook is essential for both residents and practicing neurosurgeons or ENT physicians who need to master and or refresh their knowledge of the best approaches for prevention and management of bleeding and DVT in their patients nbsp

Intensive Care in Neurology and Neurosurgery Daniel Agustin Godoy, Gustavo Rene Piñero, 2013-03 Neuromonitoring is

the tool of trade in intensive care and should incorporate cutting edge technology with patience repeated clinical observation careful identification of neuroworsening The aim of the book is to be of practical use and to assist the clinical practice of the busy physician The clinical examination belongs to the introductory section of the book and an abundance of technology with specific emphasis on the importance of intracranial pressure comes in the following parts Since the patient with an injured brain can have chances only if other organs and systems as the lungs and the acid base equilibrium etc are preserved a section of the book covers the interactions between the affected brain and other organs The way the brain reacts to different insults has common aspects as inflammatory responses edema etc but also specific features Sections five to nine summarize the most relevant pathologies from ischemic to hemorrhagic lesions trauma tumors etc and also mentions new comers as the specific problems related to the expanding field of neuroradiological interventions Finally neurointensive care does not exist without knowledgeable nurses The intracranial pressure measurement starts or unfortunately ends with a catheter well maintained and that becomes vital when the drainage of hydrocephalus is concerned Dealing with patients with severe brain damage has plenty of ethical implications up to the problems related to brain death and organ donation This book is published in two volumes
