Ghosh, 1984-10-24 Although not previously well documented many instances of regional economic integration occur among Third World countries Joint industrial planning monetary integration trade expansion and investment planning are among the many facets of economic integration discussed in this volume Integration schemes most likely to contribute to development are difficult to achieve because ultimate success depends on the willingness and ability of the nations involved to negotiate conditions that contribute to the development of the region as a whole and that assure an acceptable distribution of benefits within the region The variety of theories and practical examples of regional integration plans detailed here document the complexity of integrated planning and the difficulties in achieving the desired results This work defines and explores the many factors necessary for understanding the difficulties involved in economic integration and cooperation among developing countries **Future Survey Annual 1985** Michael Marien, 1987-01-01 Urban Development in the Third World Pradip K.
