Geography And Enlightenment:

Geography and Enlightenment David N. Livingstone, Charles W. J. Withers, 1999-12-15 *Geography and Enlightenment* explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas Rupke Susanne Seymour Charles Watkins and Charles W J Withers

Placing the Enlightenment Charles W. J. Withers, 2008-09-15 The Enlightenment was the age in which the world became modern challenging tradition in favor of reason freedom and critical inquiry While many aspects of the Enlightenment have been rigorously scrutinized its origins and motivations its principal characters and defining features its legacy and modern relevance the geographical dimensions of the era have until now largely been ignored *Placing the Enlightenment* contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions to its content and concerns Investigating the role space and location played in the creation and reception of Enlightenment ideas Charles W J Withers draws from the fields of art science history geography politics and religion to explore the legacies of Enlightenment national identity navigation discovery and knowledge Ultimately geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition Lavishly illustrated and engagingly written *Placing the Enlightenment* will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world

Enlightenment Geography R. Mayhew, 2000-08-30 *Enlightenment Geography* is the first detailed study of the politics of British geography books and of related forms of geographical knowledge in the period from 1650 to 1850 The definition and role of geography in a humanist structure of knowledge are examined and shown to tie it to political discourse Geographical works are shown to have developed Whig and Tory defences of the English church and state consonant with the conservatism of the English Enlightenment These politicizations were questioned by those indebted to the Scottish Enlightenment *Enlightenment Geography* questions broad assumptions about British intellectual history through a revisionist history of

geography *Studies in Eighteenth-Century Culture* Timothy Erwin, Ourida Mostefai, 2001-05-22 Always interdisciplinary the field of eighteenth century studies has recently become genuinely international To reflect this global emphasis this volume of *Studies in Eighteenth Century Culture* gathers four essays under the rubric of *The Geography of Enlightenment* Set in a variety of local habitations from the European periphery to the American frontier each of these essays addresses how a relative sense of place determines interpretation Other essays explore such topics as the aesthetics of novelty in Addison and Sterne the influence of the religious lyric on Richardson's *Clarissa* feminine authority in Eliza Haywood's spectatorial fiction and the issue of male effeminacy in English dance history

Enlightenment Geography R. Mayhew, 2000-12-01 *Enlightenment Geography* is the first detailed study of the politics of British geography books and of related forms of geographical knowledge in the period from 1650 to 1850 The definition and role of geography in a humanist structure of knowledge are examined and shown to tie it to political discourse Geographical works are shown to have developed Whig and Tory defences of the English church and state consonant with the conservatism of the English Enlightenment These politicizations were questioned by those indebted to the Scottish Enlightenment *Enlightenment Geography* questions broad assumptions about British intellectual history through a revisionist history of geography

Kitāb Jughrāfiyat Inārat Al-'ālam Yūḥannā Jirjis Abū Zayd, 1935 *The Ottoman Enlightenment* Pinar Emiralioglu, 2020-07-31 *The Ottoman Enlightenment* argues that the knowledge exchange between the seventeenth and eighteenth century Ottoman geographers and their contemporaries around the world laid the foundations of the Ottoman Enlightenment and contributed to enlightenment in the global context Drawing on a rich body of maps travel accounts campaign diaries coordinate tables and atlases in Ottoman Turkish German and French this study contributes significantly to the reconceptualization of the Enlightenment as a movement that was much more expansive and inclusive than previously shown in historical literature

The Geography of Enlightenment Paul Jundar, 2002-05-01 *Where the desert meets the mountains* a Christian mystic discovers a path to Enlightenment founded upon a new Cosmology a new Philosophy and the unique Cloud of Unknowing meditation technique which uses the art of forgetfulness to reach Christ Consciousness

L'Amérique Méridionale: The Map That Shaped Brazil in the 18th Century Junia Ferreira Furtado, 2024-09-23 This book explores how the origins of Brazil's modern borders can be traced to the cartography of the Americas produced by the eighteenth century French cartographer J B B d Anville It argues that this map reflects the geopolitical policies of the Portuguese diplomat D Luis da Cunha who was involved in Portugal's negotiations with the Spanish to formally establish Brazil's frontiers and highlights how and why these policies were adopted in the Treaty of Madrid in 1750

The Geographies of Enlightenment Edinburgh Phil Dodds, 2022 *Edinburgh* was an Enlightenment city of regional national and global influence But how did the people of Enlightenment Edinburgh understand and order their world How did they encounter compare and produce different kinds of spaces from the urban to the world scale And how did this city set the universal standards by which other places should be judged and transformed The

Geographies of Enlightenment Edinburgh answers these questions by exploring the thousands of urban plans county surveys travel accounts and encyclopaedias that passed through a busy Edinburgh bookshop over four decades It reveals how these geographical publications were produced and shared and sheds light on the people who bought and used them including moral philosophers silk merchants school teachers ship s surgeons and slave owners This is the story of how specific methods of mapping space came ultimately to predict and organize it creating a new world in Edinburgh s image By connecting global processes of knowledge production to intimate accounts of its reception in the city this book deepens our understanding of the Scottish Enlightenment and the world it made Reinterpreting Exploration Dane Keith Kennedy,2014 Exploration was a central and perhaps defining aspect of the West s encounters with other peoples and lands Rather than reproduce celebratory narratives of individual heroism and national glory this volume focuses on exploration s instrumental role in shaping a European sense of exceptionalism and its iconic importance in defining the terms of cultural engagement with other peoples In chapters offering broad geographic range the contributors address many of the key themes of recent research on exploration including exploration s contribution to European imperial expansion Western scientific knowledge Enlightenment ideas and practices and metropolitan print culture They reassess indigenous peoples responses upon first contacts with European explorers their involvement as intermediaries in the operations of expeditions and the complications that their prior knowledge posed for European claims of discovery Underscoring that exploration must be seen as a process of mediation between representation and reality this book provides a fresh and accessible introduction to the ongoing reinterpretation of exploration s role in the making of the modern world *Enlightenment, Modernity and Science* Paul A. Elliot,2010-10-30 Scientific culture was one of the defining characteristics of the English Enlightenment The latest discoveries were debated in homes institutions and towns around the country But how did the dissemination of scientific knowledge vary with geographical location What were the differing influences in town and country and from region to region Enlightenment Modernity and Science provides the first full length study of the geographies of Georgian scientific culture in England The author takes the reader on a tour of the principal arenas in which scientific ideas were disseminated including home town and countryside to show how cultures of science and knowledge varied across the Georgian landscape Taking in key figures such as Erasmus Darwin Abraham Bennett and Joseph Priestley along the way it is a work that sheds important light on the complex geographies of Georgian English scientific culture Kant and Culture Tommaso Morawski,2022-05-25 Kant and Culture Studies on Kant s Philosophy of Culture is a collective volume focusing on the figure of Kant as Kulturphilosoph The challenge of this volume which gathers scholars who differ in language method approach and perspective is to shed light from different angles on the relevance and complexity of a subject Kant and culture that has often been confined to the margins of the Kantforschung and has only recently received the attention it deserves Yet on closer inspection the issues related to the notion of culture in Kant are so varied and at the same time so pervasive and transversal

that they allow for important connections between his philosophical reflections different areas from aesthetics to theoretical philosophy from ethics to philosophy of history from philosophy of law to moral philosophy from anthropology to religion from geography to pedagogy providing a privileged point of view to explore and understand his idea of a Bestimmung des Menschen Moreover Kant's contribution to the philosophy of culture offers important insights into its contemporary crisis its loss of significance and interest A starting point to try to articulate a notion of culture in a normative sense that is elaborated not in reference to a certain class of objects defined as cultural education the arts the sciences but formally as a particular relationship we can establish with any object subject or experience

Geographies of the Book Charles W.J. Withers, 2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography *Geographies of the Book* explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received

Georgian Geographies Miles Ogborn, Charles W. J. Withers, 2004 This text provides an interdisciplinary examination of the geographical nature of culture and society in 18th century Britain and the British world The book's introduction identifies the key areas of study as the geographical constitution of empire the Enlightenment and the public sphere These themes are explored by examining the connections between space place and landscape in the 18th century in relation to the emergent empire in the Caribbean and north west America and Britain itself Under consideration are topics such as landscape art London's art world geography books mapping the geography of erotic fiction provincial science and the production of domestic space in the early English novel This collection offers substantial empirical evidence and should be a valuable contribution to 18th century studies for research and teaching staff postgraduates and advanced undergraduate students in geography history literary studies the history of art postcolonial studies and the history of science

The Yale Journal of International Law, 2007 *The Enlightenment of the World* John George Abizaid, 1910 **Early American Literature**, 2007 *Environment and Planning*, 2009 **Libraries and Enlightenment** Gina Dahl, 2014 During the Enlightenment other peoples and also their cultures were much discussed with debates often focusing on their value as human beings and the level of tolerance that they were to be granted Books on outer worlds classified in libraries as historia were an integral part of these deliberations as they conveyed distinct perceptions of peoples and places to their readers This book explores how the broader world was presented to a Norwegian audience by means of both statistical analysis of books on the other in Enlightenment libraries and consideration of how peoples were

portrayed in bestselling works Intriguingly book distribution was very uneven and the views that the bestsellers promoted were as multifaceted as the Enlightenment itself with the texts expressing both prejudice and admiration depending on the identity of the author and the very context in which they were written
