Gupta, 1977 Fuzzy Relational Calculus: Theory, Applications And Software (With Cd-rom) Yordan Kostadinov Kyosev, Ketty Georgieva Peeva, 2005-01-06 This book examines fuzzy relational calculus theory with applications in various engineering subjects The scope of the text covers unified and exact methods with algorithms for direct and inverse problem resolution in fuzzy relational calculus Extensive engineering applications of fuzzy relation compositions and fuzzy linear systems linear relational and intuitionistic are discussed Some examples of such applications include solutions of equivalence reduction and minimization problems in fuzzy machines pattern recognition in fuzzy languages optimization and inference engines in textile and chemical engineering etc A comprehensive overview of the authors original work in fuzzy relational calculus is also provided in each chapter The attached CD Rom contains a toolbox with many functions for fuzzy calculations together with an original algorithm for inverse problem resolution in MATLAB This book is also suitable for use as a textbook in related courses at advanced undergraduate and graduate levels Fuzzy Automata decision processes , 1977 **Multiple Attribute Decision Making** Gwo-Hshiung Tzeng, Jih-Jeng Huang, 2011-06-22 Decision makers are often faced with several conflicting alternatives How do they evaluate trade offs when there are more than three criteria To help people make optimal decisions scholars in the discipline of multiple criteria decision making MCDM continue to develop new methods for structuring preferences and determining the correct relative weights for criteria A compilation of modern decision making techniques Multiple Attribute Decision Making Methods and Applications focuses on the fuzzy set approach to multiple attribute decision making MADM Drawing on their experience the authors bring together current methods and real life applications of MADM techniques for decision analysis They also propose a novel hybrid MADM model that combines DEMATEL and analytic network process ANP with VIKOR procedures The first part of the book focuses on the theory of each method and includes examples that can be calculated without a computer providing a complete understanding of the procedures Methods include the analytic hierarchy process AHP ANP simple additive weighting method ELECTRE PROMETHEE the gray relational model fuzzy integral technique rough sets and the structural model Integrating theory and practice the second part of the book illustrates how methods can be used to solve real world MADM problems Applications covered in the book include AHP to select planning and design services for a construction project TOPSIS and VIKOR to evaluate the best alternative fuel vehicles for urban areas ELECTRE to solve network design problems in urban transportation planning PROMETEE to set priorities for the development of new energy systems from solar thermal to hydrogen energy Fuzzy integrals to evaluate enterprise intranet web sites Rough sets to make decisions in insurance marketing Helping readers understand how to apply MADM techniques to their decision making this book is suitable for undergraduate and graduate students as well as practitioners

Non-Conventional Preference Relations in Decision Making Marc Roubens, 2013-06-29 The important issue of how

to overcome rigidity inadequacy and human inconsistency regarding conventional assumptions on preferences in decision making for example regarding yes no crispness or transitivity is discussed by well known experts in this volume In the introductory articles analyses of those conventional assumptions are given and the need for reconsiderations and changes as to preference related aspects is advocated The following contributions are mainly concerned with issues related to valued including fuzzy preference relations such as analysis of their properties and their use in various decision making and choice problems and in group decision making

Recent Developments in the Ordered Weighted Averaging Operators: Theory and Practice Ronald R. Yager, Janusz Kacprzyk, Gleb Beliakov, 2011-02-03 This volume presents the state of the art of new developments and some interesting and relevant applications of the OWA ordered weighted averaging operators The OWA operators were introduced in the early 1980s by Ronald R Yager as a conceptually and numerically simple easily implementable yet extremely powerful general aggregation operator That simplicity generality and implementability of the OWA operators combined with their intuitive appeal have triggered much research both in the foundations and extensions of the OWA operators and in their applications to a wide variety of problems in various fields of science and technology Part I Methods includes papers on theoretical foundations of OWA operators and their extensions The papers in Part II Applications show some more relevant applications of the OWA operators mostly means as powerful yet general aggregation operators The application areas are exemplified by environmental modeling social networks image analysis financial decision making and water resource management

Multivariable Technological Systems D.P. Atherton, 2014-06-28 Recent results in the development and application of analysis and design techniques for the control of multivariable systems are discussed in this volume
