*Evolution and Eden* Jerry D. Korschmeier, 1998 In this study Jerry Korschmeier examines how an evolutionary perspective impacts on a traditional understanding of original sin He reviews the history of the doctrine as well as the church's interaction with the theory of evolution Using clues provided by evolution and process thought the author suggests an interpretation of original sin that incorporates both modern Catholic scholarship and scientific evidence Ultimately he moves toward a theology of evolution BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Nature and Scripture in the Abrahamic Religions: 1700-Present Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of *Nature and Scripture in the Abrahamic Religions* contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation Furthermore questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences Contributors are J Matthew Ashley Robert E Brown Elizabeth Chmielewski Edward B Davis Henri Wijnandus de Knijff Marwa Elshakry Richard England Menachem Fisch George Harinck Bernhard Kleeberg Scott Mandelbrote G Blair Nelson Alexei V Nesteruk Jitse M van der Meer Rob P W Visser and William Yarchin The Cambridge Companion to Genesis Bill T. Arnold, 2022-05-12 The *Cambridge Companion to Genesis* explores the first book of the Bible the book that serves as the foundation for the rest of the Hebrew Scriptures Recognizing its unique position in world history the history of religions as well as biblical and theological studies the volume summarizes key developments in Biblical scholarship since the Enlightenment while offering an overview of the diverse methods and reading strategies that are currently applied to the reading of Genesis It also explores questions that in some cases have been explored for centuries Written by an international team of scholars whose essays were specially commissioned the Companion provides a multi disciplinary update of all relevant issues related to the interpretation of Genesis Whether the reader is taking the first step on the path or continuing a research journey this volume will illuminate the role of Genesis in world religions theology philosophy and critical biblical scholarship **Nietzsche Was Probably Right: A Postcritical Assessment of the Christian Paradigm and Its Deity** Steven Malinak, 2014-07-13 For a variety of reasons recent literature that focuses on the rationality of belief in God and the viability of the Christian worldview fails to stimulate critical thinking in the general population of believers *Nietzsche Was Probably Right* succeeds where many of these other works miss the mark It educates rather than coerces it focuses on issues critically relevant to the vast majority of Christians most importantly it does not preach to the choir but instead offers a balanced objective comprehensive overview of the issues Its

tone and inclusive unbiased approach welcomes nonbelievers and believers into this important conversation offering a perspective that will satisfy anyone seeking a critical understanding of the Christian faith and its deity *Defining Love* Thomas Jay Oord,2010-06 Engages cutting edge scientific research on love and altruism to offer a definition of love that is scientifically theologically and philosophically adequate **Evolution and Faith** Bas van Iersel,Christoph Theobald,Hermann Häring,2000 Concilium has long been a household name for cutting edge critical and constructive theological thinking Past contributors include leading Catholic scholars such as Hans K ng Gregory Baum and Edward Schillebeeckx and the editors of the review belong to the international who s who in the world of contemporary theology

**Human Significance in Theology and the Natural Sciences** Christopher L. Fisher,2010-02-03 The medieval worldview that regarded human beings as at the center of God s plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity s place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century Science reveals just the opposite providing solid evidence in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity s indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world s situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history

**Perspectives on an Evolving Creation** Keith B. Miller,2003-09-25 According to the authors of this book who explore evolutionary theory from a clear Christian perspective the common view of conflict between evolutionary theory and Christian faith is mistaken Written by contributors representing the natural sciences philosophy theology and the history of science this thought provoking work is informed by both solid scientific knowledge and keen theological insight The three sections of the book address 1 relevant biblical historical and scientific background 2 the scientific evidence for an evolving

creation and 3 theological issues commonly raised in connection with evolution including the nature of God's creative activity the meaning of the miraculous and the uniqueness of humankind Woven through the volume are short meditations designed to direct readers toward worshipping the God of providence Contributors Laurie J Braaten Warren S Brown Jr David Campbell Robin Collins Edward B Davis Terry M Gray Jeffrey K Greenberg Deborah B Haarsma Loren Haarsma James P Hurd Conrad Hyers David N Livingstone Keith B Miller John C Munday Jr George L Murphy Mark A Noll Robert John Russell Howard J Van Till David L Wilcox Jennifer Wiseman

Does God Roll Dice? Joseph Bracken, 2012-04-01 Albert Einstein is often quoted as saying that God does not play dice claiming an orderly and predictable structure to the universe Today advances and presumptions in the field of quantum mechanics pose a serious challenge to such a position It's a challenge not only for nuclear physicists but also for Christian theologians who work to explain God's providence for the world In Does God Roll Dice noted Jesuit scholar Joseph Bracken claims that something like directed chance Teilhard de Chardin is God's normal mode of operation in a world always perilously poised between order and chaos Bracken adopts the relatively new concept of self organizing or self correcting systems out of the natural and social sciences to deal with controversial issues in the ongoing religion and science debate At the same time he deliberately keeps the language and context of the book suitable for the intelligent non professional reader

**Perspectives on Science and Christian Faith**, 2007 *Christology and Science* F. LeRon Shults, 2008 The dialogue between theology and science has blossomed in recent decades but particular beliefs about Jesus Christ have not often been brought to the forefront of this interdisciplinary discussion even in explicitly Christian contexts This book breaks new ground by explicitly bringing the specific themes of Christology into dialogue with contemporary science It engages recent developments in late modern philosophy of science in order to articulate the Christian beliefs about Jesus Christ in a way that responds to challenges and opportunities that have arisen in light of various scientific discoveries The main chapters deal with Incarnation Atonement and Parousia After a brief treatment of the history of the shaping of these ideas the author traces developments in some of the sciences that have challenged these formulations evolutionary biology cultural anthropology and physical cosmology Each chapter also summarises some of the popular constructive responses to these developments After clarifying the way in which the Christian understanding of God and of humanity shape the task of reforming Christology each chapter concludes with a programmatic outline of ways in which we might articulate the identity agency and presence of Jesus Christ in dialogue with late modern science and culture

**Christian Scholar's Review**, 2007 *AAR/SBL Annual Meeting Program* American Academy of Religion. Meeting, 1998 *The Catholic Periodical and Literature Index*, 2000 American Book Publishing Record Cumulative 1998 R R Bowker Publishing, 1999-03 **Gregorianum**, 1999 Current Contents Institute for Scientific Information (Philadelphia), 2000 **Current Contents**, 1999 **Encyclopedia of Science and Religion** Jacobus Wentzel Van Huyssteen, 2003 A multidisciplinary approach that addresses all aspects of the dialogue between the sciences and the world's religions reaching

into the humanities as well as into the physical sciences and technology Examines controversial issues such as human cloning and stem cell research long with more traditional questions such as the origins of life the nature of sin and the philosophy of science and religion 4 volumes *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2001
