Fools Of Time Studies In Shakespearean Tragedy:

Fools of Time Northrop Frye, 1966-02-06 In the Alexander Lectures for 1965-66 at the University of Toronto Dr Frye describes the basis of the tragic vision as being in time in which death as the essential event that gives shape and form to life defines the individual and marks him off from the continuity of life that flows indefinitely between the past and the future In Dr Frye's view three general types can be distinguished in Shakespearean tragedy the tragedy of order the tragedy of passion and the tragedy of isolation in all of which a pattern of being in time shapes the action In the first type of which Julius Caesar Macbeth and Hamlet are examples a strong ruler is killed replaced by a rebel figure and avenged by a nemesis figure in the second represented by Romeo and Juliet Anthony and Cleopatra and Troilus and Cressida authority is split and the hero is destroyed by a conflict between social and personal loyalties and in the third Othello King Lear and Timon of Athens the central figure is cut off from his world largely as a result of his failure to comprehend the dynamics of that world What all these plays show us Dr Frye maintains is the impact of heroic energy on the human situation with the result that the heroic is normally destroyed and the human situation goes on surviving Fools of Time will be welcomed not only by many scholars who are familiar with Dr Frye's keen critical insight but also by undergraduates graduates high school and university teachers who have long valued his work as a means toward a firmer grasp and deeper understanding of English literature

The Reception of Northrop Frye, 2021-08-31 The widespread opinion is that Northrop Frye's influence reached its zenith in the 1960s and 1970s after which point he became obsolete his work buried in obscurity This almost universal opinion is summed up in Terry Eagleton's 1983 rhetorical question Who now reads Frye In *The Reception of Northrop Frye* Robert D Denham catalogues what has been written about Frye books articles translations dissertations and theses and reviews in order to demonstrate that the attention Frye's work has received from the beginning has progressed at a geomantic rate Denham also explores what we can discover once we have a fairly complete record of Frye's reception in front of us such as Hayden White's theory of emplotments applied to historical writing and Byron Almon's theory of musical narrative The sheer quantity of what has been written about Frye reveals that the only valid response to Eagleton's rhetorical question is a very large and growing number the growth being not incremental but exponential
