Smith,2018-04-13 As the United States grew into an empire in the late nineteenth century notions like sea power derived not only from fleets bases and decisive battles but also from a scientific effort to understand and master the ocean environment Beginning in the early nineteenth century and concluding in the first years of the twentieth Jason W Smith tells the story of the rise of the U S Navy and the emergence of American ocean empire through its struggle to control nature In vividly told sketches of exploration naval officers war and most significantly the ocean environment Smith draws together insights from environmental maritime military and naval history and the history of science and cartography placing the U S Navy s scientific efforts within a broader cultural context By recasting and deepening our understanding of the U S Navy and the United States at sea Smith brings to the fore the overlooked work of naval hydrographers surveyors and cartographers In the nautical chart s soundings names symbols and embedded narratives Smith recounts the largely untold story of a young nation looking to extend its power over the boundless sea *The American Army and Navy Journal, and Gazette of the Regular, National Guard and Reserve Forces* ,1922 [Proceedings of the United States Naval Institute](#) United States Naval Institute,1922 [Progressives in Navy Blue](#) Scott Mobley,2018-05-15 This study examines how intellectual and institutional developments transformed the U S Navy from 1873 to 1898 The period

was a dynamic quarter century in which Americans witnessed their Navy evolve. Cultures of progress, clusters of ideas, beliefs, values, and practices pertaining to modern warfare and technology guided the Navy's transformation. The agents of naval transformation embraced a progressive ideology. They viewed science, technology, and expertise as the best means to effect change in a world contorted by modernizing and globalizing trends. Within the Navy's progressive movement, two new cultures, Strategy and Mechanism, influenced the course of transformation. Although they shared progressive pedigrees, each culture embodied a distinctive vision for the Navy's future.

Naval Seamen's Women in Nineteenth-Century Britain Melanie Holihead, 2024-11-19

Explores the lived experiences of the women of lower deck seamen in the nineteenth century British navy. This book explores the lived experiences of the women, the mothers, sisters, foster mothers, of motherless children, but above all, the wives of lower deck seamen in the nineteenth century British navy. It makes extensive use of the allotment scheme, a system which enabled men to convey portions of their pay to dependants at home. The scheme had been devised by a Royal Navy worried by the adverse effect on naval manpower caused by experienced and mature sailors quitting the service in order to support loved ones suffering poverty on shore. Drawing also on civil parish and local data, the book reveals hitherto unknown differences between naval and civilian patterns of nuptiality, family life, occupation, and household structure. It illustrates the impact of naval breadwinners' long-term absence in analyses of local migration, mutual support networks, and clusterings of same-ship families. And to bring the picture to life, it includes microhistories and stories of individual women. The book concludes that while the sailor's woman's allotted place in the popular imagination shifted with changing perceptions of sailors' reputation and standing, a constant otherness attached to women who chose marriage to long-absent men and a life of necessary self-reliance.
