Golden On Strasbourg:

The Golden Book Douglas Crawford McMurtrie, 1927 **Gold Was the Mortar** Henry Kraus, 2019-07-02 Originally published in 1979 Gold Was the Mortar details the financing and the building of the medieval cathedrals at Paris Amiens Toulouse Lyon Strasbourg York Poitiers and Rouen The book examines the raising of funds and their expenditure not only on the Cathedrals themselves but also on the worldly ambitions of the bishop or archbishop which went beyond the wars and natural disasters theory to explain the reasons that caused the delays in building the cathedrals The book also looks at the issues of building the cathedrals such as the availability of finance and how for some there was a steady flow of funds while others suffered prolonged breaks The book also provides case studies of specific cathedrals and examines how places such as York were held up by the internecine disputes with Canterbury Toulouse and Poitiers by the vast expropriations following conquests and Lyon by the suppression of the commercial and social hierarchy All the cathedrals depended on the benevolence of patrons but the part played by the commoners as revealed in wills and contemporary documents was an extraordinary contribution usually exceeding that of the nobility and royalty and sometimes that of the hierarchy itself

Golden Book of Strasbourg Anna Maria Giusti, 1994 **The Glitter of Gold** Marc Flandreau, 2004-03-04 This book studies the so far unexplored operation of the international monetary system that prevailed before the emergence of the international gold standard in 1873 Conventional wisdom has it that the emergence of gold as a global anchor was both an inescapable and desirable evolution given the exchange rate stability it provided and Britain's economic predominance This study draws on a wealth of archival sources and abundant new statistical evidence fully detailed in the appendix to demonstrate that global exchange rate stability always prevailed before the making of the gold standard This was despite the heterogeneity among national monetary regimes based on gold silver or both The reason for the stability before the establishment of the gold standard is France's bimetallic system France by being in a position to trade gold for silver and vice versa effectively pegged the exchange rate between gold and silver at its legal ratio of 15 5 Part I of the book studies exactly how this mechanism worked Part II focuses on the respective behaviour of private concerns and arbitrageurs on the one hand and authorities such as the Bank of France on the other hand in order to underline the constraints and opportunities that were associated with bimetallism as an international regime Finally Part III provides a new view on the collapse of bimetallism and its replacement by a gold standard It is argued that bimetallism might well have survived and that the emergence of the gold standard was by no means inescapable Rather it resulted from a massive coordination failure at both national and international levels a failure that was a preview of the interwar collapse of the gold standard The Blue and Gold, 1922 **House & Garden**, 1983-07 *Selected Pictures from the Book of Gold of Victor Hugo* Victor Hugo, 1885 *The Fluctuations of Gold*, by Baron Alexander Von Humboldt...*The Law of Payment*, by Francois Grimaudet...tr.
