

станом вышеприведенных факторов и переменных, оказывающих непосредственное влияние на осуществляемые здесь процессы. Именно они предопределяют структуру предприятия, необходимые ресурсы и культуру, которые отражают составные и главные черты внутренней среды.

Один из способов адаптации предприятия и создания эффективного организационно-экономического обеспечения функционирования предприятий в современных условиях – трансформация предприятий, т. е. организационно-экономическое преобразование предприятия путем сращения, объединения, разделения, рекомбинации и т. д.

Трансформация может быть отнесена как к пассивной адаптации, когда предприятия через различные виды трансформации в большей степени приспособляются к рынку, так и к активной, когда, например, через образование картелей оказывается активное воздействие на рынок путем ограничения конкуренции.

В пищевой промышленности широкое распространение получили различные виды трансформации, в первую очередь интеграция предприятий через объединение и сращивание и рекомбинация через франчайзинг и создание совместных предприятий.

Эффективность интегрированного предприятия связана в первую очередь с уменьшением транзакционных издержек, т. е. затрат на адаптацию к изменениям рынка за счет более тесной кооперации между сращиваемися предприятиями, а также снижения общих управленческих затрат и др.

Таким образом, переход предприятий пищевой промышленности на путь активного экономического развития в современных условиях достигается за счет совершенствования организационно-экономического механизма на всех уровнях управления экономической, включая государственный, отраслевой, региональный уровни и товаропроизводителя.

Необходимое условие для этого – создание на предприятиях эффективных систем стратегического развития и перехода на инновационный путь развития.

Анализ показателей энергопотребления на предприятиях пищевой промышленности

С. А. Соляренко, аспирант, **Т. М. Панченко**, канд. экон. наук, доцент
Московский государственный университет пищевой промышленности

Вопросы энергопотребления и обеспечения производства в развитии отечественной пищевой промышленности в научных исследованиях не рассматриваются как первоочередные. Исключение отчасти составляет лишь изучение ресурсопотребления сахаропроизводства. По вопросам энергопотребления в пищевой индустрии в целом не имеется широко известных исследовательских работ, поэтому в современных учебных пособиях используют показатели удельного энергопотребления по подотраслям по статистическим данным за 1984 г. [2]. Кроме того, в официальных статистических агентствах получить современную дифференцированную инфор-

мацию также затруднительно, так как сбор данных по регионам проводится изначально в общей совокупности по пищевой промышленности без выделения по подотраслям. С экономическими показателями обслуживания производства на предприятиях пищевой промышленности ситуация еще более сложная в плане получения достоверных средних удельных показателей. Данная проблема существовала и в прежние времена, когда по некоторым отраслям, в первую очередь машиностроению, этим вопросом занимался большой ряд известных экономистов. Это связано с рядом вполне объективных причин, главные из которых – низкая удельная

энерго- и трудоемкость в продукции предприятий пищевой отрасли и выходящая отсюда их низкая удельная составляющая затрат на обеспечение производства. Кроме того, абсолютная цена на эти же энерго- и трудовые ресурсы для промышленных потребителей народнохозяйства в целом на протяжении долгого периода, особенно с 70-х годов XX века, была на много ниже, чем в странах западного мира, что позволяло данные вопросы относить к второстепенным.

По нашему мнению, сегодня актуальность вопросов энергопотребления и затрат на обслуживание производства возрастает в связи с непропорциональным ростом затрат на
