The Unification of Germany Charles River Charles River Editors, 2018-09-07 Includes pictures Includes contemporary accounts Includes online resources and a bibliography for further reading When invoking the term German unification many might initially think of the tumultuous period at the end of the 20th century when communist East Germany and democratic West Germany came together to form the modern German state However that was technically a reunification because Germany was first unified as a nation state in 1871 That unification formed a state much larger than today's Germany stretching from Strasbourg in the Alsace region in today's France almost 1 500 kilometers to Kaliningrad in contemporary Russia on the Baltic Sea This unified Germany was an experiment with few historical precedents The 19th century was indeed the Age of Nationalism but German speakers had traditionally been spread out across Europe including the Austrian Empire loose confederations such as the Holy Roman Empire and many other countries German unity was a seemingly impossible dream held by nationalists for many years but it became a reality when Prussia the largest state in the German Confederation pursued a deliberate and aggressive strategy to bring as many German speaking territories under its control That is not to say most Germans resisted unification because even as life in an assortment of German states had some advantages an underlying insecurity prevailed in principalities lacking overarching authority German speaking lands had been the sites of some of the continent's most brutal wars Moreover there was a growing sense of German cultural and linguistic togetherness fostered by nationalists artists writers and composers Not surprisingly German unity in 1871 caused geopolitical ripples that reverberated for decades Other larger European powers such as Britain France and Russia came to feel threatened by the rise of Germany These tensions were still prevalent at the outbreak of World War I in 1914 and it became even more important in World War II In part this was because Germany also became an economic powerhouse fundamentally altering the global economy Alongside the rapid expansion of the United States trade went through a transformation that still has ramifications today The forces driving Germany's unification in the 19th century were similar to other trends of the era but there were many specific and contingent factors playing out before 1871 In this respect the unification of Germany is both an unusual and unfamiliar story
