Fallout An American Nuclear Tragedy

Philip L. Fradkin

Fallout An American Nuclear Tragedy:

Fallout Philip L. Fradkin, 2004 Documents the story behind the story of the nuclear testing in southern Nevada during the 1950s when radioactive fallout drifted into surrounding communities First sheep began dying according to the author and then people The book places blame for the incident on all levels of government from presidents to radiation monitors The author is a Pulitzer Prize winning journalist Annotation copyrighted by Book News Inc Portland OR **Fallout** Philip L. Fradkin, 1989 Reviews the nuclear testing that took place in the 1950s and 1960s in Nevada and the extensive damage to surrounding areas and people wrought by those tests as well as the government's failure to accept accountability

Downwind of the Atomic State James C. Rice, 2023-03-07 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health *Downwind of the Atomic State* focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science *Outside the Gates of Eden* Peter Bacon Hales, 2014-04-11 The cultural historian and author of *Atomic Spaces* offers a comprehensive account of the Baby Boomer years from the atomic age to the virtual age Born under the shadow of the atomic bomb with little security but the cold comfort of duck and cover drills the postwar generations lived through and led some of the most momentous changes in all of American history In this new cultural history Peter Bacon Hales explores those decades through a succession of resonant moments spaces and artifacts of everyday life Finding unexpected connections he traces the intertwined undercurrents of promise and peril From newsreels of the first atomic bomb tests to the invention of a new ideal American life in Levittown from the teen pop music of the Brill Building and the Beach Boys to Bob Dylan's canny transformations from the painful failures of communes to the breathtaking utopian potential of the digital age Hales reveals a nation in transition

as a new generation began to make its mark on the world it was inheriting Outside the Gates of Eden is the most comprehensive account yet of the baby boomers their parents and their children as seen through the places they built the music and movies and shows they loved and the battles they fought to define their nation their culture and their place in what remains a fragile and dangerous world *Greening the Red, White, and Blue* Thomas Jundt,2014 In popular imagination environmentalism is often linked to Rachel Carson's Silent Spring and the political activism of the 1960s and 70s that moved increasing numbers of Americans to insist on a better quality of life open spaces clean air and water beautification campaigns But these interpretations have obscured the significant origins of environmentalism as a moral and intellectual broadside against the growing power of corporate capitalism both domestically and in the postwar liberal international order the United States was enacting abroad In *Greening the Red White and Blue* Thomas Jundt shows how many Americans came to view powerful corporations and a federal government bent on economic growth as threats to human health and the environment Fallout from atomic testing air and water pollution the proliferation of pesticides and herbicides all connected to the growing dominance of technology and corporate capitalism in American life led a variety of constituencies to seek solutions in what came to be known as environmentalism In addition to political and legal campaigns to effect change an alternative form of civic participation emerged beginning in the late 1940s as growing numbers of citizens turned to what they deemed environmentally friendly consumption practices The goal of this politically charged consumption was not only to protect themselves and their families from harm but also to achieve social change at a time when many believed the government was placing the desires of business before the needs of its citizens Politicians responded to the growing environmental concerns of middle class Americans but in the end continual political compromises with corporate power meant weak laws and lax enforcement Many citizens sought refuge in an alternative green marketplace including organic foods natural fiber clothing alternative energy and everyday products designed to have minimal environmental impact In doing so they attempted to create a community for those who shared their concerns and frustrations as well as their vision for a different American Way Thomas Jundt's work highlights the intertwining of consumerism and environmentalism amidst the growing power of corporate capitalism and government in postwar America

Conservation and Environmentalism Robert C. Paehlke,2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who's who of the world's leading conservation and environmental professionals Best Reference Source Outstanding Reference Source

Seeing Nature Through Gender Virginia Scharff,2003 Environmental history has traditionally told the

story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred bunnies Others are dead serious as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet

Miles from Nowhere Dayton Duncan, 1993 The author set out in his battered truck to explore the frontier an area with fewer than two people per square mile where he met a collection of unforgettable Americans and discovered ironic and surprising comparisons with the past

Small Press, 1989

Nevada's Environmental Legacy James W. Hulse, 2009-02-28 Nevada's relatively brief history it became a state in 1864 has been largely a story of the exploitation of its natural resources Mining has torn down mountains and poisoned streams and groundwater Uncontrolled grazing by vast herds of sheep and cattle has denuded grasslands and left them prey to the invasion of noxious plant species and vulnerable to wildfire Clear cut logging practices have changed the composition of forests and induced serious soil erosion More recently military testing including hundreds of atomic blasts to determine the efficacy of nuclear weapons has irreversibly polluted expanses of fragile desert landscape And rampant development

throughout the state over the past four decades along with the public's growing demand for recreational facilities has placed intolerable demands on the arid state's limited water resources and threatened the survival of numerous rare plant and animal species. Veteran historian and Nevada native James W. Hulse considers the state's complex environmental history as a series of Faustian bargains between the state's need for economic development and the industries, government agencies, and individuals that have exploited Nevada's natural resources with little concern for the long-term consequences of their activities. His survey covers all these issues and examines public attitudes about the environment and the role of federal and state agencies in creating, interpreting, and enforcing environmental policies.
